INDEX.

FRUIT TREES, SHRUBS, AND PLANTS.

	PAGE.		PAGE.
Almonds	24	Nectarines	23
Apples	5	Olives	41
Apricots	20	Oranges, Lemons, Citrons, and Limes	42
Asparagus roots	40	Papaws	30
Berberries	30	Peaches	21
Blackberries	30	Pears	10
Cherries	16	Persimmon	30
Chestnuts	29, 44, 47,	Plums	17
Cranberry	31	Pomegranate	41
Currants	26	Quinces	25
Esculent Roots, &c.	40	Raspberries	26
Figs	40	Scions for ingrafting, &c.	39
Filberts	29	Strawberries	31
Gooseberries	27	Tropical Fruits	43
Grapes	32	Walnuts	28
Hazlenuts	29	Whortleberries	31
Hops	40	Selections of fruits.	92
Medlars	29		
Mulberries	24		

ORNAMENTAL TREES AND PLANTS.

Ornamental Trees, First Class	44	Herbaceous flowering plants	78
Second "	47	Medicinal and culinary plants	
Flowering Shrubs	49	Hemerocallis, or Day Lily	77
Evergreens	55	Honeysuckles	59
Auriculas	78	Iris, or Fleur de Louis	76
Camellia japonica, Japan Rose	91	Pæonies	70
Carnations	72	Pinks	74
Chrysanthemums	75	Polyanthus	77
Cowslips	77	Primroses	77
Dahlia	91	Roses	61
Hawthorn quicks, and others, for hedges	40	Vines and Creepers	58

ABBREVIATIONS

ATTACHED TO THE NAMES OF FRUITS.

- P denotes those described in Prince's Treatise on Fruits, or Pomological Manual.
M " those described in the London Pomological Magazine.
L " those described in Lindleys Guide, &c.
R " those described in Ronald's Pyrus Ma.us Brentfordiensis.
V " those from the collection of Professor Van Mons.
A " American native varieties.

CURSORY REMARKS.

The Proprietors in tendering their new Catalogue with *reduced prices*, desire to state that their Fruit and Ornamental Trees, &c. are of *large size and vigorous growth*, and superior to any before offered to the public. The Establishment contains at the present period *more than a million of Trees and Plants*, and the Proprietors are willing to enter into arrangements of the most liberal description both as to prices and credit with all such persons as desire large quantities of Trees, &c. and with those proprietors of Nurseries who wish to extend their collections, and with such other persons as may wish to establish new Nurseries, they will enter into arrangements *on terms which will allow ample time for advantageous reimbursement*. Any persons who are desirous to act as Agents in towns where no agency at present exists, will please to communicate their views in regard thereto.

The fruit trees in this catalogue are either grafted or inoculated, and are propagated from such European and American kinds as have acquired a well merited celebrity, the whole collection of which has recently gone through a most careful revision, and the selections have been made with great care and attention. Every precaution is taken which is necessary to preserve the different varieties completely distinct, and all the peach and other trees are perfectly healthy, and free from disease. Many persons, however, are apt to purchase trees without regard to any point but their cheapness, and not unfrequently, after the toil and expense of years, find them, when they arrive at bearing, absolutely worthless. The strongest proofs the proprietors can give the public of their anxiety to guard against misconception, are the *exact descriptions* contained in the Treatises recently published, and other works of a similar character, in which they are now engaged; the result of which will be, that any person, however ignorant on the subject, cannot fail to know if he has been deceived.

In regard to the identity of the various kinds of fruits, the Proprietors do not pretend to a perfect infallibility, but *they do constantly aim at that point*, and therefore if an inadvertent error occasionally arise, it is because their unwearied scrutiny has not been able to guard against it.

One great advantage possessed by the trees sent from this establishment, is their particular *hardihood*. From the proximity of the nurseries to the ocean on the one side, and to the East River on the other, with a free and open exposure to all winds, accompanied by the particular advantage of being so far north as to acclimatize the trees to any still more northern section of our country, they acquire a degree of hardihood which renders them extremely eligible for removal to colder latitudes, and to support the rigors of less favored regions, and trees thus hardened by nature are also found to succeed best in our southern states. It is doubtless to these causes that is to be attributed the general success which has attended the trees sent from this establishment, even when transmitted to Nova Scotia, the Canadas, &c. and the past winter of 1831-32, has incontestibly proved their superior hardihood, they having withstood the severity of the season uninjured, while immense numbers of trees elsewhere in the middle, and in the Eastern States, were destroyed thereby.

Specimen trees of every variety of fruit comprised in this catalogue, are now standing in the experimental orchards of the establishment, and all the kinds are ready for sale. The stock of some of the newest sorts, however, is limited, and the trees, in consequence of their recent introduction are of less size. Many other varieties will be announced hereafter in a Supplement Catalogue, additional time being necessary as well for their propagation as for judicious investigations. New fruits are not added to the collection, merely, because their names differ, but a selection is made of those only which merit and have received the encomiums of persons acquainted with the subject.

A large number of the apples are the same as described by Mr. Cox, and the Treatise on Fruits, or Pomological Manual contains descriptions of near 800 varieties of the different fruits.

It seems almost superfluous to remark, that the trees and plants in this catalogue not particularly designated as tender, are hardy.

Every tree, when sent from the garden, is duly labelled; and from fifteen to thirty trees are usually packed in each matted bundle.

Where trees are requested for exportation, they are carefully packed in mats, casks, or boxes, so as to be sent to Europe, the West Indies, or any part of America, with perfect safety, for which a reasonable charge is made.

All packages of trees are delivered at Fulton-market wharf, New York, by water, *free of freight*; and, when particularly desired by persons at a distance, they will be shipped to any port they may designate: and agreements have been made with the lines of packets to Boston, Baltimore, Washington, Richmond, Charleston, Savannah, &c. to take bundles of trees at very moderate freights; and if desired to be transmitted to Philadelphia, they can be sent there by the transportation Line in one day, and the canals now forming in every section of our country, present cheap and easy modes of conveyance. No care is wanting on the part

of the proprietors to give such directions as may cause them to arrive safely; but it is to be expressly understood, that after being thus delivered or shipped at New York, they are wholly at the risk of the person who orders them.

To such persons as desire fruit trees, &c. and are not themselves acquainted with the qualities of the different kinds, it is recommended that they specify in their orders the number of trees wanted of each species of fruit, and leave the selection to the proprietors, who will make it according to the views and tastes of the applicants; and in such cases they may rely that only those will be sent which are of the most approved kinds; and when desired, those that will ripen in succession; and larger trees can generally be selected in such cases. They can however if they prefer it, obtain all the necessary information by referring to the "*Treatise on Fruits*" &c.

It is also well, where the orders are small to unite those of several neighbors in one, which will both abridge the trouble of execution and the expense of packing and transportation; and as each tree is labelled, it can cause no confusion.

Persons who may wish to make selections of fruits of *American* origin, will find them particularly designated. It sometimes occurs that the demands for particular kinds of fruit trees are so much greater than anticipated, that it renders those kinds for the moment comparatively scarce, except such as are of small size. In such cases, in order to prevent any delay, it would be well that the orders should authorize, that such kinds may be replaced by others of equal quality, which trust will be executed in a manner worthy of the confidence reposed.

American Indigenous Trees, Shrubs, and Plants, or their seeds, suitable for sending to Europe, will be supplied in assortments from five to one thousand dollars or more, as enumerated in the catalogue, No. 4.

The proper seasons for transplanting trees, are the months of October, November, and December, in autumn; and March and April in the spring. For bulbous flower roots, the best season is from July to October inclusive. Greenhouse plants can be forwarded with safety at any season, except the winter months, and even then, if the conveyance is wholly by water.

In addition to these, Scions of Fruit Trees, Grape Vines, &c. can be transmitted from October to April. Many persons are prevented from ordering trees, from a supposition that they will not bear distant transportation, an idea so extremely erroneous, that it ought to be exploded; the proprietors are in the constant habit of sending trees, and even the most delicate plants, to the remotest parts of the Union with success, and they annually transmit large quantities to the different cities of Europe, where in some cases they have from 300 to 500 miles land carriage, after crossing the Atlantic. The success which attends these expeditions is an ample proof of the superior manner in which the articles are packed for their respective voyages; and persons sending orders, need only state the extent of land and water carriage, and the articles will be packed accordingly.

Catalogues may be obtained *gratis* of either of the agents, or by direct application to us; and orders left with them, or forwarded (post paid) to the proprietors, will meet attention; but it is expected that persons with whom no acquaintance exists, will, in forwarding orders otherwise than through an agent, designate some person in New-York who will be responsible for the payment, or tender a suitable reference. It is requested that those who, in sending orders, mention only the numbers by which the trees, &c. are enumerated in the catalogue, should be particular to state the *edition* from which they make their selections, as there are some numerical variations in the different editions. All letters requiring information will be promptly replied to, and the proprietors prefer that applications be made to them *direct* on every subject.

The postage of a letter is a trifling thing, but to one who receives a great number, it becomes burdensome; persons are therefore desired to send their letters post paid.

As many persons in the Union act as agents for the different nursery establishments, it is particularly requested, that where orders are intended for us, it be plainly specified: and every invoice hereafter will have a *printed heading, and our signature, to prove that it is genuine.* We mention these cautions for good and conclusive reasons, knowing that we have been injured by deceptions. And we therefore wish that in every case the above proof be insisted on, for the proprietors take upon themselves no guarantee, unless such an invoice from them can be produced.

N. B. It is expected that no persons having similar establishments will copy the different remarks attached to this catalogue, without crediting the source; as it would be extremely unreasonable that other persons should take upon themselves the responsibility for any errors which may have been inadvertently advanced by the authors of this publication

W. PRINCE & SONS.

PRICES OF TREES, &c.

The prices have been greatly reduced for a large number of articles; in many cases 25, 33, and even 50 per cent. below former rates, and the average prices throughout the catalogues will be found as low or lower than the same articles, *equally genuine and of equal quality*, can be obtained elsewhere.

N. B. Where ornamental trees of very large size are wanted for streets, avenues, &c. or where fruit trees are wanted of extra large size, they will be charged in proportion.

APPLES. *Pommiers. Pyrus malus.*

25 to 37½ cents each; \$20 to \$25 per 100, according to the kind and quality.

TABLE FRUIT.

C denotes those which have proved good for cider also.

K those which are also proper for cooking or preserving.

1 Prince's yellow harvest, <i>for tarts and table, superior, A</i>	ripe in July	41 Bullock's pippin, <i>or sheep nose, C K</i>	Nov. to Feb.
2 Sine qua non, A	do	42 Pennock's red winter, A	Oct. to Feb.

		52	Variegated leaved pine, 50 cts per pair
		53	†True Chili
		54	Black roseberry

N. B. Many other kinds have been imported that have not yet been increased, but will be inserted in a Supplement Catalogue.

GRAPES. *Vignes. Vitis vinifera.*

Those marked thus * 37½ cents each. † 50 cents each. † 75 cents each.

Those not marked are \$1 each.

T denotes celebrated table grapes. W denotes celebrated wine grapes.

L denotes those from the garden of the Luxembourg.

The above prices are for single plants, or where a few vines only are wanted. Those who wish to establish vineyards, and consequently desire a large number, will be supplied at a great reduction from these prices.

For descriptions of the respective varieties, and directions for their culture, see "Prince's Treatise on the Vine."

In order that persons establishing vineyards may make their selections judiciously and with a proper regard to latitude and locality, we have attached to a great number of varieties the name of the particular department of France where each originated; therefore, by turning to the map, the latitude will be ascertained. The synonyms are carefully arranged, and in no case is the same fruit *knowingly* twice enumerated in this list, and where a doubt exists, it is so stated.

| 110 Verdelho, or <i>Verdilhio</i> | 548 Muscatel |
| 111 Nigrinho, <i>\$8 per dozen</i> | |

German and Swiss grapes.

These are principally celebrated wine grapes; and I have information from the highest sources, that those numbered 119, 132, 134, 137, 138, 139, 144 and 145, are considered among the most valuable for vineyards, on account of their abundant and regular crops, and their resisting the severest winters uninjured. In addition to these here enumerated, a number of varieties of grapes are cultivated in Germany which are necessarily arranged under other heads in this catalogue, including the principal part of the Burgundy grapes; and I am assured by a gentleman who has a very extensive vineyard on the Rhine, that the grapes numbered 1, 7, 93, 94, 95, 98, 100, 104 and 105, support there all the rigors of the climate, and produce immense and regular crops.

| 158 Hermann | 167 St. Valentine, T |
| 159 Lehrmann | 168 Terret, <i>Herault</i> |
| 160 Large damask, T | |

The following grapes being less known, and the most of them being in no other co-
 lection in our country, I have placed them under distinct divisions as to color and
 form; the name of the Department of France where each originated being
 Italics. Those marked T are particularly celebrated for the table; the others, a
 though cultivated for wine in France, are many of them fine table fruits also.

Black, purple, and red round grapes.

The departments which compose the districts of Burgundy, Champagne, and other celebrated wine districts of France, can be seen by reference to the map, and the names of the departments being attached to the foregoing list of grapes, it will easily be perceived which kinds are used for the wines of the respective localities.

American native grapes.

All the following are genuine American species and varieties, except No. 394 which is a native variety of a foreign species, and Nos. 498, and 441, deemed dubious.

- | | |

N. B. Many new American varieties are under cultivation, and will be for sale soon when an extra catalogue of them will be published.

Grape Vines in quantity.

Fine varieties for wine, *assorted by the proprietors*, 20 to 25 dollars per 100

Fine varieties for the table, *assorted by the proprietors*, 25 dollars per 100.

Do. do. of the more rare varieties, 40 dollars per 100.

Common French varieties, *such as are usually sent out in mass from their vineyards*, 12 to 15 dollars per 100.

SCIONS &c.

Scions of Grapes of a number of kinds can be supplied, if applied for in season, at from 5 to 12 dollars per 100, or in less quantities; but in no case will scions of any variety be sent to a less amount than the price of a vine; and of the very rare varieties, three scions will be considered equivalent in value to a vine. Scions of several kinds of Grapes, 20 to 25 dollars per thousand.

Scions of all kinds of Fruit trees, suitable for ingrafting, will be supplied at 50 cents per dozen, where the price of a tree does not exceed that sum; but where it does, the same price will be charged for the dozen scions as for a tree of the same kind; and in no case can a charge of less than the price of a tree be made for grafts of any variety, however few may be desired.

Scions of Currants, Gooseberries, Raspberries, Berberries, Mulberries, Quinces, Figs, Poplars, Willows, &c. will be supplied at prices in proportion to their respective value.

Scions of the five species of Osiers, or Willows, most celebrated for basket-making can

- be supplied, suitable for planting hedge-rows, at from 3 to 5 dollars per 100, or 25 dollars per 1000.
- Hawthorns for hedges, of the celebrated Washington Thorn, at 1 dollar per 100, or 5 dollars per 1000.
- Do. do. extra large, 6 to 8 dollars per 1000.
- English hawthorn quicks, 1 dollar per 100, and 5 dollars per 1000.
- Do. do. extra large and strong, 6 to 8 dollars per 1000.
- Buckthorn, or *Rhamnus catharticus*, for hedges, 3 dollars per 100.
- Do. larger size, 6 dollars per 100.
- Yellow Locust, small trees for hedges, at from 5 to 8 dollars per 100.
- Osage Orange, or *Maclura*, for hedges, 40 dollars per 100.
- Chinese arbor vitæ, small, for hedges, 20 dollars per 100.
- Privet, or prim, for hedges, 12 dollars per 100.
- Scions of do. 4 dollars per 100, and 25 dollars per 1000.
- Honey Locust, or Three thorned Acacia, 5 to 10 dollars per 1000

ESCULENT ROOTS, &c.

- Asparagus, Common, per 100, 60 cts. and per 1000, 5½ dollars.
- Large Dutch, per 100, 75 cts. to 1 dollar; per 1000, 6½ to 7½ dollars according to the age.
- Artichoke, Jerusalem, per dozen, 50 cents; per 100, 3 dollars.
- Green globe, per dozen, 2½ dollars; per 100, 15 dollars.
- Cardoon, per dozen, 2½ dollars; per 100, 15 dollars.
- Chamomile, double, each 25 cents; per dozen 1½ dollars; per 100, 8 dollars.
- Horse radish, per dozen, 1½ dollars; per 100, 5 dollars.
- Dyer's Madder, each 25 cents; per 100, 10 dollars.
- Liquorice, each 50 cents; per dozen, 5 dollars.
- Hop Roots, per 100, 5 dollars; per 1000, 30 dollars.
- Sea Kale, per dozen, 2 dollars; per 100, 12 dollars.
- Rhubarb for Tarts, each, 12 to 25 cts. according to age; per dozen, 1½ to 2½ dollars; per 100, 10 to 18 dollars.
- Common, or Rhapontic, each 50 cents; per dozen, \$4.50.
- Palmated officinal, each 50 cents; per dozen, 5 dollars.
- Thick leaved, each 50 cents; per dozen, 5 dollars.
- True Medicinal, or *Rheum australe*, each 75 cents; per dozen 6 dollars.

FIGS. *Figuiers. Ficus carica.*

The culture of this delicious fruit having recently become an object of particular attention, and requiring no more care to covering in winter than the delicate kinds of grapes, the greatest pains have been taken to extend the collection by importations of the choicest kinds from the south of France, Italy, and elsewhere; and it now forms a concentration of this fruit, unrivalled in extent and excellence.

Those marked thus * 50 cents. † 75 cents. Those not marked are \$1.

D denotes those described in Duhamel.

- 1 †Early brown
- 2 *Large late brown
- 3 †Large white
- 4 †Ischia
- 5 Marseilles
- 6 *Brown Malta

- 7 Large blue
- 8 Fine white
- 9 Brunswick, or Madonna, *fine*
- 10 Versailles, D
- 11 Servantine, D
- 12 Napolitaine

13 Poulette	33 Jerusalem
14 White bourjassotte	34 Lipara, D
15 Large green, <i>grosse verte</i>	35 Longue printanière
16 Violette, or <i>perruquine</i> , very productive, D	36 Marseillaise, D excellent
17 Cuprea	37 Negrette
18 Geneva	38 Oeil de perdrix
19 *Small blue	39 Peau dure

29 Datte	49 Black
30 Datte montagnette	50 Datte quotidienne
31 Franque paillarde	51 Rocarde
32 Grosse aubique noire, D	52 Versailles twice bearing, or <i>Figuier bifère</i>

POMEGRANATE. *Grenadier*.

Those marked thus * are 75 cents, those thus † \$1; and those thus ‡ \$1 50.

The fruit requires in this latitude, that the trees should during winter be placed in a cellar, or some other place free from frost. South of the Potomac, it is supposed they will not require that care.

1 *Fruit bearing 50 to 75 cts	<i>Punica granatum</i>
2 †Large Malta	<i>melitensis</i>
3 ‡Sweet fruited	<i>dulcis</i>
4 †Acid fruited	<i>acida</i>
5 ‡Semi-acid	<i>mi-acida</i>
6 *Double crimson	<i>rubra plena</i>
7 ‡Great Double crimson	<i>plena major</i>
8 ‡Prolific	<i>prolifera</i>
9 †White flowered and fruited	<i>alba</i>
10 †Double white flowering	<i>alba plena</i>
11 †Yellow flowering	<i>flava</i>
12 *Dwarf profuse flowering	<i>nana</i>
13 †Chinese	<i>chinensis</i>

OLIVES. *Oliviers*.

Those marked thus * are \$1; thus † \$1,50; and thus ‡ \$2.

These species require in this latitude, during winter, that the trees be placed in a cellar, or some other situation free from frost. It is considered that south of Virginia this care will not be requisite.

1 †European	<i>Olea europæa</i>
2 †Blanquet	<i>var.</i>
3 †Bouquetier	<i>var.</i>
4 Negron	<i>var.</i>
5 †Large Boutignan	<i>var.</i>
6 †Large redouneac	<i>var.</i>
7 †Le pas à bouquet	<i>var.</i>
8 †Common, or <i>ordinaire</i>	<i>var.</i>
9 †Large fruited, à gros fruit	<i>var.</i>

0 †Eatable, or <i>bonne à manger</i>	<i>var.</i>
1 †Vermilion	<i>var.</i>
2 †Grossanne	<i>var.</i>
3 †Long leaved	<i>longifolia</i>
4 †Broad leaved	<i>latifolia</i>
5 Box leaved, \$1	<i>buxifolia</i>
6 †Twisted leaved	<i>obliqua</i>
7 †Warted cape	<i>verrucosa</i>
8 Wave leaved cape, \$3	<i>undulata</i>
9 †Cape-of-Good-Hope broad leaved	<i>capensis</i>
10 Madeira, \$3	<i>excelsa</i>
11 Chinese fragrant, 1 to 2 dollars	<i>fragrans</i>
22 *Smooth leaved	<i>lœvis</i>
23 American, 75 cents	<i>americana</i>
24 *Narrow leaved	<i>angustifolia</i>
25 Asiatic, \$3	<i>asiatica</i>
26 Mauritius lance leaved, \$2	<i>lancea</i>
27 *Twiggy, or branching	<i>media</i>
28 †Gold blotch leaved	<i>fol. var.</i>
29 †Rosemary leaved	<i>rosmarinifolia</i>
30 *Holly leaved	<i>spinosa, vel. illicifolia</i>

N. B. See greenhouse catalogue for other varieties.

ORANGES, LEMONS, CITRONS, SHADDOCKS AND LIMES.

These require sufficient protection in winter to keep them from freezing in the states north of South Carolina: in the latter state and those south of it, they do not require it. In Italy, extensive nurseries of these fruits are cultivated, some of which contain 200 varieties. A work has recently been published at Paris, edited by Messrs. Risso and Poiteau, which contains engravings and descriptions of 160 varieties, comprising the most valuable and interesting. It is from an inspection of those figured in this work that the new varieties have been selected which are here enumerated; to obtain which has been attended with great difficulties. About 40 new varieties, not here enumerated, will be ready for sale in September 1833, when an extra catalogue of them will be furnished.

Those marked thus *, if of 1 year's growth from inoculation, \$2

2	do	do	do	3
3	do	do	do	3 50

Those marked thus † are \$3 50 each. Some of these kinds are of three, and others but of one and two years growth.

Those marked thus † will be each \$5; and being quite new, are not at present large.

ORANGES.

1 *Seville orange, or <i>Bigarade</i>	<i>Citrus vulgaris</i>
Ditto, of smaller size, \$1 50	
2 †Double flowering do, or <i>Orange à fleur double</i>	<i>flore pleno</i>
3 †Horned, or hermaphrodite do	<i>corniculata</i>
4 *Curled leaved, or cluster flowering, <i>riche de- pouille</i>	<i>crispa</i>
5 †Turkey bigarade, or willow leaved	<i>lunata</i>
6 †Striped leaved Turkey do. Striped willow leaved, or <i>Turquin panaché</i>	<i>lunata, vel salicifolia, fol. var.</i>
7 *Golden-striped bigarade	<i>aureo variegata</i>
8 *Silver striped bigarade	<i>argenteo variegata</i>
9 *Silver striped curled leaved do	<i>argen. var. crispa</i>
10 †Blotched leaved do	<i>maculata</i>
13 †New spatatore do	<i>spatharia</i>
14 †New Ytan do	<i>Ytan</i>

- | | |
|--|---|
| 15 *West India sweet orange, <i>oranger à fruit doux</i> | Citrus aurantium |

And a great number of other kinds, which are enumerated in catalogue No. 4.

ROSES. *Rosiers. Rosa.*

This favorite flower has been cultivated to such an extent in Europe, that it combines almost every tint of which nature is susceptible, and some of their collection contain above 1400 superb varieties. The following have been selected on account of their fragrance, size, beauty, singularity, or delicacy, and the original plants of many of these kinds cost from \$1 50 cents to \$4 75 cents each, exclusive of the expenses and losses attending importation. The collection occupies an acre of ground where all the kinds are marked with their respective names, and during the period of their bloom they present an accumulation of varied beauties scarcely to be rivalled and those who may desire it, can make their selections when in flower. The various kinds of roses present, also, a great diversity in respect to size as well as in other points, some being naturally of very tall stature, others of medium height, and others quite diminutive. All the following Roses will endure the winters of any part of the Union without protection, with the exception of a few of the China roses. The culture of roses is of the most simple and easy description, and information on that point will be found in the *Treatise* recently published. The different kinds of Roses have been critically examined when in flower, and the remarks as to their qualities is the result of the personal observation of the proprietors.

These Roses are almost wholly on their own bottoms, a few of the most rare kinds only being inoculated, and the prices are lower than ever before offered to the public. Where a dozen plants are ordered a discount of 25 per cent will be made—where fifty are ordered 30 per cent, and to such Nurseries as purchase an assortment of a hundred or more to revend, 40 per cent, and two hundred or more 50 per cent.

Those marked thus * are 25 cents each. † are 37½ cents each. ‡ are 50 cents each. Those marked thus ¶ are 75 cents each. Those not marked are \$1 each.

The first section of Roses extending to No. 730, is comprised of Double Roses only and is a selection of the most superb and interesting.

	803 Montezuma rose, <i>of Mexico</i>

CHINA ROSES.

Most of which are monthly, or ever-blooming.

The monthly varieties, when planted in the open ground, are particularly interesting on account of expanding their flowers in March and April, when those of other kinds have not yet made their appearance. They continue to bloom throughout the summer; and in the autumnal months their numerous flowers also afford particular gratification, as nature then seems most to need their cheering influence. Nearly the whole number support our winters with little or no protection, as designated by this mark †; those most tender need only to have a box or barrier placed over them during winter. Where any kinds are designated as climbers, it is meant that they grow tall, and are suitable for training, &c.

530 †Single China rose	Rosa indica	\$0 4
531 †Double red, or daily Ditto, per dozen	<i>pallida</i>	4

Where the whole collection of roses is taken, or where a large number is wanted, a liberal discount will be made.

PEONIES. *Pivoines.*

This class of flowers has recently attracted more attention in Europe than this, a monograph of which has lately been published in London. Most of the varieties are extremely splendid, and others possess striking peculiarities. Anticipating that a similar taste would be evinced in this country, the proprietors have, by great exertion, obtained every variety possible.

CARNATIONS. *Oiellets doubles. Dianthus caryophyllus.*

This most interesting class of flowers, which so deservedly commands universal admiration, has received particular attention; and the entire collection now comprises about 200 superb varieties—the most of which have been considerably increased, and the others are in a course of propagation. It may be well to remark, that sometimes a branch, or even a whole plant, may vary the color of its flowers; but this is not very frequently the case.

Those marked thus * are 37½ cents each. † are 50 cents each. ‡ are 75 cents each. Those not marked are \$1 each. ¶ denotes those whose flowers are rose leaved.

CHINESE CHRYSANTHEMUMS.

Chrysanthemum sinense.

This superb flower (often denominated *Artemisia*) is deservedly esteemed; being perfectly hardy, and affording a most brilliant display, at a time when the chilling blasts of autumn have left us but the vestiges of departed verdure. It is therefore a subject of much gratification, that the number obtained from China exceeds 60 varieties, nearly the whole of which are offered to the public in this catalogue.

The following are 25 to 37½ cents each.

- | | |
|---|---------------------------|

323 Four leaved do. &c.	quadrifolia
324 †Willow herb	Lythrum salicaria
325 Whorl flowered do	verticillatum
326 Clustered mint	Mentha glomerata
327 Blue monkey flower	Mimulus ringens
328 Winged stalked do	alatus
329 Yellow flowered do	luteus
330 Crimson monarda	Monarda didyma
331 Yellow do	punctata
332 Pale purple do	oblongata
333 Pale red monarda	fistulosa
334 White do	gracilis
335 †Scarlet do	kalmiana
336 †Missouri do	Russeliana
337 †Downy purple do	mollis
338 †New seeding do	<i>var.</i>
339 Basil leaved do	clinopodia
340 †Beautiful plicate leaved moræa	Moræa plicata
341 Forget-me-not	Myosotis arvensis
342 †Bird's foot Nuttalia	Nuttalia pedata
344 †Large white primrose	Oenothera speciosa
345 Fraser's large do	fraseri
346 Yellow fruticose do	fruticosa
347 †Rose colored do	rosea
348 Dwarf do	pumila
349 Glaucons leaved do	glauca
350 *Cross petalled do	cruciata
351 †Magnificent flowered do	taraxiciflora
352 *Spiny rest harrow	Ononis spinosa
353 *European adder's tongue	Ophioglossum vulgatum
354 *Yellow ciliated orchis	Orchis ciliaris
355 †Purple fringed do	fimbriata

356 *Beautiful orchis, &c.	<i>Orchis spectabilis</i>
357 †Oriental poppy	<i>Papaver orientale</i>
358 †Caucasian do	bracteatum
359 †Welsh do	cambricum
360 Blackberry lily	<i>Pardanthus chinensis</i>
361 †Flesh colored passion flower	<i>Passiflora incarnata</i>
362 †Yellow flowered do	lutea
363 Spotted leaved do. 60 cts	maculata
364 Serrated pedicularis	<i>Pedicularis gladiata</i>
365 †Pale yellow do	pallida
366 †Bell shaped penstemons	<i>Penstemon campanulata</i>
367 †Missouri do	digitalis
368 Hairy do	pubescens
369 Alpine bastard vetch	<i>Thaca alpina</i>
370 Ribband grass	<i>Phalaris arundinacea, picta</i>
371 Irony leaved phlomis	<i>Phlomis ferruginea</i>
372 Tuberous rooted do	tuberosa
373 Red panicle phlox	<i>Phlox paniculata</i>
374 White do do	alba
375 White sweet do	suaveolens
376 †Late white sweet do	tardiflora
377 †Variegated leaved do	fol. varieg.
378 Tall late red do	acuminata
379 Spotted stalked do	maculata
380 †Dwarf purple spotted do	nana
381 Pyramidal do	pyramidalis
382 †Carolina do	carolina
383 †Flesh colored, or three flowered do	carnea, vel triflora
384 †Virginian do	virginica
385 Early purple divaricated do	divaricata
386 † striped do do	striata
387 † whitish do do	alba
388 Oval leaved dwarf do	ovata
389 †Rough leaved do	aspera
390 Canada creeping do	stolonifera
391 Bristle leaved phlox	setacea
392 †Fine pink colored do	ancena
393 †Fine American do	americana
394 †Autumnal do	autumnale
395 †Corymbose do	corymbosa
396 †Coldry's do	coldryana
397 †Tall growing do	excelsa
398 *Smoothest do	glaberrima
399 †Intermediate do	intermedia
400 †Involuerated do	involuerata
401 †Privet leaved do	ligustrifolia
402 †Dwarfsnowy flowered do	nivalis
403 †Reflexed do	reflexa
404 †Rough leaved do	scabra
405 Owl leaved, or moss pink	subulata
407 †Waved leaved do	undulata
408 Purple everlasting pea	<i>Pisum maritimum</i>
409 Blue podalyria	<i>Podalyria australis</i>
410 *White podalyria	alba
411 Yellow do	tinctoria
412 May apple, or wild mandrake	<i>Podophyllum peltatum</i>
413 *Blue Greek valerian, or Jacob's ladder	<i>Polemonium ceruleum</i>

These are vines or
climbers

114 American blue valerian	Polemonium reptans
115 † white do	album
116 Single flowering tuberose, 12 cents	Polyanthus tuberosa
117 Double do do. 12 cts. or \$1 pr doz.	pleno
118 † Striped leaved do, beautiful	striato
119 * Various leaved cinquefoil	Potentilla intermedia
120 Hoary pycnanthemum	Pycnanthemum incanum
121 Lance leaved do	lanceolatum
122 Double feverfew	Pyrethrum parthenium pl.
123 * Double yellow ranunculus	Ranunculus acris pl.
124 † Double white do. or fair maids of France	aconitifolius, pl
125 Creeping yellow do	repens
126 † Glittering double yellow do	pleno
127 Rhomboid leaved do	rhomboides
128 Bulbous rooted do	bulbosus
129 Long leaved do	longifolius
130 Maryland rhexia	Rhexia mariana
131 Virginian do	virginica
132 Purple rudbeckia	Rudbeckia purpurea
133 Jagged leaved yellow do	lasciniata
134 Hairy leaved yellow do	fulgida
135 Three lobed do	triloba
136 Fragrant pinnate leaved do	pinnata
137 † Large musk do	moschata
138 Lobed leaved do	digitata
139 Bloody leaved dock	Rumex sanguineus
140 Austrian sage	Salvia austriaca
141 † Chinese sansevieria	Sansevieria carnea
142 White officinal soapwort	Saponaria officinalis
143 Double white do	p'eno
144 Double rose colored do	roseo
145 * Purple side saddle-flower	Sarracenia purpurea
146 † Yellow do. and others	flava
147 † Purple Siberian saxifrage	Saxifraga crassifolia
148 Grandulated do	granulata
149 Italian scabious	Scabiosa australis
150 Alpine do	alpina
151 European scullcap	Scutellaria rubicunda
152 Florentine do	peregrina
153 Live-for-ever, or orpine	Sedum telephioides
154 European do	telephium
155 Yellow flowering stonecrop	aizoon
156 Neat flowering do	pusillum
157 Purslane leaved do	ternatum
158 Poplar leaved do	populifolium
159 † Caucasian fringed do	spurium
160 † Yellowish do	ochroleucum
161 † Evergreen orpine	anacampseros
162 Alpine groundsel	Senecio doronicum
163 Winged seratula	Serratula alata
164 Smooth leaved sida	Sida napæa
165 Palmated sida	dioica
166 Hyslop leaved ironwort	Sideritis hyssopifolia
167 Woolly leaved catchfly	Silene vallesia
168 Gypsophylla leaved do	gypsophylla
169 † Aster flowered silphium	Silphium asteriscus
170 * Squarrose do	squarrosum

471 Perfoliate leaved do silphium	Silphium perfoliatum
472 Delicate star grass	Sisyrinchium mucronatum
473 Solidago. See catalogue No. 4.	Solidago, 36 sp.
474 †Medicinal pink root	Spigelia marylandica
475 Double meadow sweet	Spiraea ulmaria, <i>pl.</i>
476 †Variegated leaved do	<i>fol. var.</i> X
477 Pride of the meadow, or <i>dropwort</i>	filipendula
478 Double flowering do	<i>pleno</i>

DAHLIAS,

At the following reduced prices.

The whole assortment comprises about 300 of the very finest that can be procured in Europe and Mexico; for the names of which, see Greenhouse Catalogue.

- Superb double varieties, each 75 cents
- Double varieties of kinds less rare, each 25 to 50 cents
- Some very superior new kinds, each \$1 and upwards
- Fine assorted kinds, per dozen, \$6
- Good do. do. per dozen \$4½
- Common do do. per dozen, \$3
- Some very superior new kinds, per dozen, 10\$.

CAMELLIA JAPONICA, or Japan Rose.

The collection of Camellias comprises all the newest varieties, most of which are very remarkable for their splendor. The prices are now greatly reduced, in consequence of the plants being much increased. Owing to the universal admiration which this plant has received, and its requiring so little care, and enduring without injury a great degree of cold, the demand has been unexampled. The proprietors have at all times very large quantities to supply wholesale orders, on which a liberal discount will be made, and their present collection exceeds 3000 plants, which they are rapidly increasing.

For a complete list of the different varieties, with the low prices at which these and other Greenhouse plants are now offered, see Greenhouse Catalogue, No. 3.

SELECTION OF FRUITS.

THE following selections of fruits of kinds best known, are well calculated for a garden and orchard, where only a limited number is required, and it may aid those who are not acquainted with the subject. The numbers refer to the enumeration in the catalogue.

APPLES.—*Thirty-five varieties.*

1	4	11	13	19	23	26	29	35	36	42	47	50	53
54	55	59	60	63	64	65	66	71	73	79	80	84	85
87	88	123	222	231	363	375							

PEARS.—*Fifty varieties.*

1	4	6	9	15	17	29	34	41	46	48	49	56	57	58
